Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claim 2 is objected to because of the following informalities: "ind pendently" should read –independently--. Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The limitation "about an inner axis transverse to the direction" (claim 1, line 9) should include "transport direction" in order to clarify from other directions ie. upward, etc. (also claim 2, line 2).

Claim 9 is also confusing how the "upwardly open die" is "openable" in the transport direction (seems that the transport direction is horizontal).

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-4 and 6-9 are rejected under 35 U.S.C. 102(b) as being anticipated by von Wichert et al. (US 4,279,609).

Art Unit: 3721

von Wichert et al. disclose a box erecting apparatus comprising box supply 2; erecting station 13 with plungers 32; support 1; pivoting inner arm 22; pivoting outer arm 24 with grab 23; and drive means (see figures 1 and 2).

The arms pivot independently of one another all along horizontal axes. The support 1 has horizontally displaceable conveyor 18 in the transport direction. Plungers 32 are vertically adjustable on holder 33a (screw adjustment) between upper and lower positions.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over von Wichert et al. (US 4,279,609).

von Wichert et al. do not distinctly disclose a horizontally displaceable supply or pivot axes, however the examiner takes OFFICIAL NOTICE that it would have been obvious to one of ordinary skill in the art to adjust the position of one element without an unexpected result.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
